

LegalEase

Phase 2: Requirement Analysis

AI-Powered Legal Document Drafting and Export Platform

Project Phase Document

This PDF consolidates the prepared project materials for this phase.

README

Phase 2 — Requirement Analysis

2.1 Functional Requirements

FR-01 — Collect document information

The system shall collect document type, parties, effective date, terms, and additional instructions.

FR-02 — Validate input

The backend shall reject missing or invalid required fields.

FR-03 — Generate draft

The system shall construct a controlled prompt and request a document draft from Gemini.

FR-04 — Preview

The frontend shall display generated content before export.

FR-05 — TXT export

The system shall export the draft as plain text.

FR-06 — DOCX export

The system shall create a Microsoft Word document.

FR-07 — PDF export

The system shall create a PDF document.

FR-08 — Error handling

The application shall show useful messages when the API, validation, or export process fails.

FR-09 — Environment configuration

Secrets such as API keys shall be loaded from environment variables.

2.2 Non-Functional Requirements

- Usability: simple form-driven interface
- Performance: avoid unnecessary API calls
- Security: never hard-code API keys
- Maintainability: separate frontend, backend, AI, and export logic
- Reliability: handle invalid requests and AI failures
- Portability: support local development and Docker deployment

2.3 Inputs

- Document type
- First party
- Second party
- Effective date

- Terms and conditions
- Additional instructions
- Optional logo

2.4 Outputs

- Structured legal-document draft
- TXT file
- DOCX file
- PDF file

2.5 Assumptions

- User has a valid Gemini API key.
- Python dependencies can be installed.
- Internet access is available when Gemini is called.
- User reviews generated content.

2.6 Out of Scope

- Legal representation
- Court filing
- Electronic signatures
- Automated legal compliance certification
- Guaranteed jurisdiction-specific legal validity
- Autonomous legal advice

02 Use Cases

Use Cases

UC-01 Generate a document

Actor: User

1. User opens LegalEase.
2. User selects document type.
3. User enters party details.
4. User selects effective date.
5. User enters terms.
6. User submits the form.
7. System validates inputs.
8. Backend creates the AI request.
9. Gemini returns a draft.
10. User reviews the result.

UC-02 Export as DOCX

1. User generates a draft.
2. User selects DOCX.
3. System formats the text.
4. System returns a downloadable Word file.

UC-03 Export as PDF

1. User generates a draft.
2. User selects PDF.
3. System creates a PDF.
4. System returns the generated file.

UC-04 Recover from failure

1. User submits a request.
2. API or AI call fails.
3. System catches the exception.
4. System displays a readable error.
5. User can retry.
