

LegalEase

Phase 3: Project Design

AI-Powered Legal Document Drafting and Export Platform

Project Phase Document

This PDF consolidates the prepared project materials for this phase.

README

Phase 3 — Project Design

3.1 High-Level Architecture

3.2 Component Responsibilities

Frontend

- Render input form
- Send request
- Display generated text
- Provide export controls
- Show errors

Backend

- Define API routes
- Validate schemas
- Coordinate generation
- Return structured responses

AI Core

- Build controlled prompt
- Call Gemini
- Normalize model output
- Handle model errors

Export Layer

- Convert generated text to TXT/DOCX/PDF
- Return file bytes or file response

3.3 API Contract

POST /generate

Request:

```
{
  "document_type": "Service Agreement",
  "party_a": "Company A",
  "party_b": "Person B",
  "effective_date": "2026-09-24",
  "terms": "Payment is due within 30 days.",
  "additional_instructions": "Use clear section headings."
}
```

Response:

```
{
  "success": true,
  "document": "GENERATED DOCUMENT TEXT"
}
```

GET /health

Response:

```
{
  "status": "ok"
}
```

3.4 Data Flow

1. Form input
2. Client validation
3. HTTP request
4. Pydantic validation
5. Prompt construction
6. Gemini request
7. Generated content
8. API response
9. UI preview
10. Export

02 Prompt Design

Prompt Design

System Role

The model should behave as a legal-document drafting assistant rather than a lawyer providing personalized legal advice.

Prompt Template

You are an AI-assisted legal document drafting system.

Create a structured first draft based only on the information supplied by the user.

Document type:
{document_type}

Party A:
{party_a}

Party B:
{party_b}

Effective date:
{effective_date}

Terms:
{terms}

Additional instructions:
{additional_instructions}

Requirements:

- Use clear section headings.
- Do not invent party facts.
- Do not invent laws, case numbers, citations, or regulatory requirements.
- Mark missing information clearly where necessary.
- Produce a professional first draft.
- Include a review notice that the draft requires appropriate human/legal review.

Prompt Safety

User input must remain data, not system instructions. Avoid allowing a user's text to override the drafting constraints.

Output Quality Checks

- Has the requested document type been used?
- Are both parties represented correctly?
- Is the effective date included?
- Are user-provided terms preserved?
- Has unsupported factual information been invented?
- Is the document structurally readable?
